

mobile.de Seller API: Setup Guide

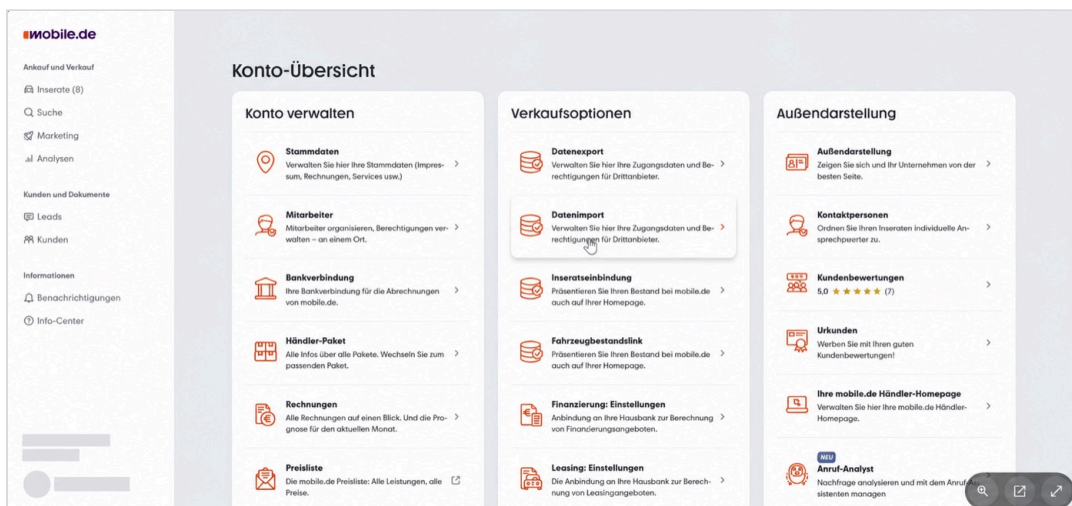

For Autaxo to manage your listings automatically, we need three details from your mobile.de dealer account. The setup takes **about 2–3 minutes** and **no phone call** is required.

Where to enter them in Autaxo: Settings → Details

1. Seller ID (shown on mobile.de as “Verkäufer-ID”)
2. Seller API username
3. Seller API password

Step 1: Open the “Datenimport” menu

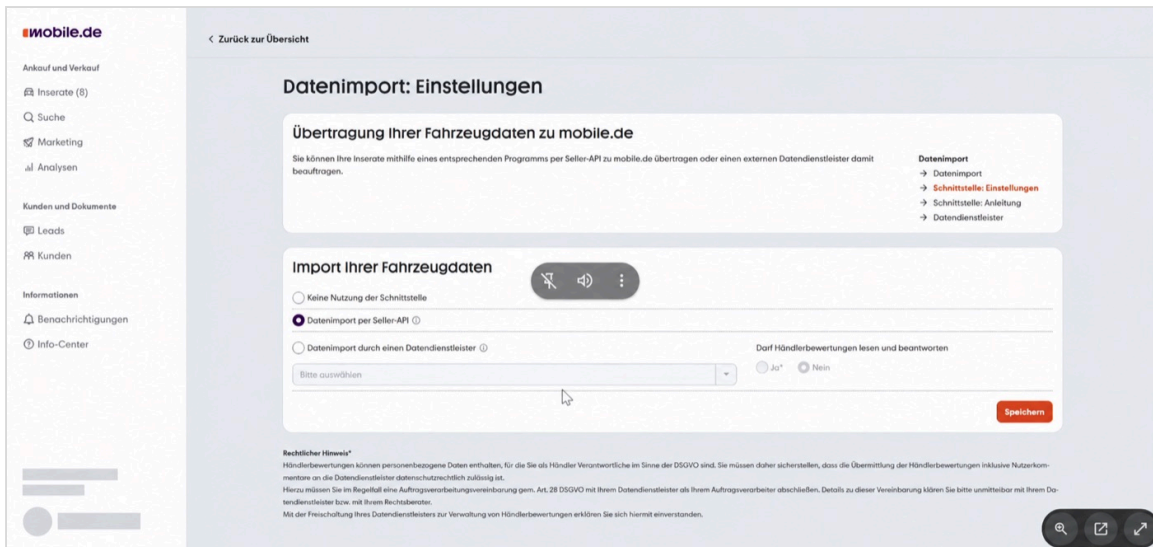

1. Log in to your mobile.de dealer area.
2. In the bottom-left corner, click **“mobile.de Konto”** below your customer number.
3. In the menu, select **“Datenimport”** (data import).
4. Click the **“Einstellungen zum Datenimport”** button (data import settings).

Account overview with the “Datenimport” menu item highlighted

Step 2: Activate the Seller API by TAN (no phone call needed)

1. Under **“Import Ihrer Fahrzeugdaten”** (import of your vehicle data), select **“Datenimport per Seller-API”**.
2. Click **“Speichern”** (save).

Data import settings with the Seller API option selected

3. mobile.de immediately sends a **TAN by SMS** to the mobile number stored in your account.
4. Enter the TAN in the “**TAN-Eingabe**” field and click “**TAN senden**”.

The interface is **activated immediately**. No need to wait for support.

If you don't receive an SMS: check the mobile number stored in your mobile.de account, or contact mobile.de support at +49 30 81097-500. This is now the exception, not the standard route.

Step 3: Copy your access details

Reload the page. You will now see a box with your **Seller ID**, your **API username** and your **API password**. Copy all three values into Autaxo under:

Settings → Details → mobile.de Integration

Mobile.de Integration

Mobile.de Verkäufer ID

12345678

Mobile.de Verkäufer API Benutzername

Dein API Benutzername

Mobile.de Verkäufer API Passwort

.....

Example of the access details box (placeholder values)

Step 4: Finish in Autaxo

Enter all three values in Autaxo and click **Save**. That's it. Autaxo now imports your listings automatically.
